

# SHOPPING BASKET WASHER

## UNIKON - SHOPPING BASKET WASHER

Shopping baskets contain remnants of vegetables, fruit, milk, flour, soft drinks and paper. This makes them a breeding ground for fungi and bacteria.

Laboratory tests have shown that supermarket trolleys and baskets host 360 times more bacteria than public toilets, including viruses and harmful types of bacteria such as Escherichia coli (E. coli) and salmonella.

The Unikon Shopping Basket Washer is a quick, efficient and environmentally friendly solution for cleaning and sanitising shopping baskets. Using closed-loop technology, the Unikon washer purifies the water flowing in the loop after every washing cycle.

The Unikon Shopping Basket Washer solution is:

- **Complete:** washes, rinses *and* sanitises
- **Efficient:** maximum washing capacity of up to 50 baskets per hour
- **Safe and hygienic:** for operators, supermarkets, customers and staff
- **Compact:** perfect for smaller spaces
- **Energy efficient and water saving:** thanks to sophisticated technology
- **Effective:** a guaranteed clean and disinfected product in one cycle
- **Smart:** competitive advantage for supermarkets

### Unikon stands for:

- Quality: use of premium brand components guarantees a high reliability
- Over 50 years of experience
- User friendliness
- Low maintenance costs
- Energy-efficient and water-saving systems
- Globally available Unikon service
