

## **UNIKON - PALLET SPIN DRYER**

**Suitable for:**  
**Plastic pallets including full and half pallets**  
**Other size pallets**

## UNIKON - PALLET SPIN DRYER

The Unikon Pallet Spin Dryer, also called centrifugal dryer, is a flexible, durable and innovative solution for drying various types of washed pallets. You can think of small half size pallets up to full size pallets

The Spin Dryer offers an astonishing drying result of a maximum of just a few grams of moisture per unit.

The spinner can be used as an extension to your existing washing machine and can be effortlessly integrated into your existing washing process. The centrifugal dryer can also be supplied as part of a Unikon washing installation, providing a complete washing and drying solution.

### Energy consumption

The efficiency of the Unikon Spin Dryer results in energy savings of up to 90% compared to air blown dryers.

The Unikon Spin Dryer is:

- **Flexible** Various sizes and types of pallets. Product dimensions with standard configuration : Height 140-170mm. Specials on request
- **Multi-purpose** Various types of pallets
- **Compact** Very suitable to save space
- **Modular** Supplement to existing washing process or part of new washing machine
- **Efficient** Standard 150-170 pallets per hour.
- **Energy saving** Consumption only 8.5 kWh. Up to 90% energy savings. Depending on product dimensions and number of products
- **Effective** Maximum residual moisture a few grams per unit
- **Noiseless** Very low noise level compared to air blown dryers

### Unikon stands for:

- Quality. Using A-brand parts
- More than 50 years of experience
- User-friendliness
- Low maintenance costs
- Water and energy efficient systems
- Global Unikon service
